**SCIENCE:** We will begin learning about position and motion this week.

## MATH VOCABULARY & CONCEPTS:

We will continue to work on multiplying 3s and 4s this week. When we reach the end of the chapter, we will go straight into the next chapter without stopping to take a formal end-of-the-chapter test.

The next chapter will focus on building bar models for helping us solve "real world" multiplication problems.

Rocket Math continues to go exceedingly well. Once again, I recently found myself replenishing my stash of rewards for all of the students' hard work. I am currently trying to come up with Plan E for those who are nearing the end of the division levels. When we started Rocket Math in October, I never expected that anyone would complete the entire program before the end of the year! I am blown away by this awesome group of math whizzes.
